Portfolio

Action:

- design choices for your portfolio

Research:

- First, I went to other platforms like Dribbble, Pinterest, and TikTok. I found inspiration on Pinterest, but I couldn't fully replicate it. However, it gave me the idea for the heading in my portfolio to move when you scroll and to go behind the mountains. When I was small, I really liked Adventure Time, so I decided to base my portfolio on that. I used ChatGPT to polish small details. For example, my heading didn't scroll smoothly, so I had to search for a solution, and now I use this tool when needed. On TikTok, there were many ideas, but for my learning outcomes page, I was inspired by Dribbble when I was searching for "my project" ideas. I added a nice background, and after receiving feedback, I changed the background color on my landing page too.

Checkpoint 4 Portfolio feedback - Erwin 16-05-2024

Yordanova, Huien Mi H.M.V. 20 days ago

I asked for feedback on my portfolio, and the teacher told me it's a very bright and colorful portfolio. He gave me suggestions to fix the learning outcomes dropdown to make it less complicated, and the movement of my "Miya's Portfolio" he told me to fix it. I still have a lot of work to do.

Checkpoint 3 Dirk - Porfolio (WK12) 15-05-2024

Yordanova, Huien Mi H.M.V. 21 days ago

Today I asked the teacher for feedback on my portfolio, he wanted to make it on Figma first and to check more websites for inspiration. Also, he told me to remove the weeks from the navbar and put there the learning outcomes .

Checkpoint 2 Peer Feedback week 12 portfolio 15-05-2024

Yordanova, Huien Mi H.M.V. 21 days ago

Today I asked for feedback from my classmate and she liked the website but told me that the effects were not moving smoothly so she suggested fixing that and also resizing the pictures in it.

Checkpoint 1 Increase your F2 score (Week 1) 24-04-2024

Yordanova, Huien Mi H.M.V. 21 days ago

Today I asked for feedback from my classmate and she liked the website but told me that the effects were not moving smoothly so she suggested fixing that and also resizing the pictures in it.

unfortunately, due to the scale from undefined to orienting, it is now this result. But, no worries, do what you do and that will certainly get you into the "beginner" next time.

Checkpoint 6 Feedback with Petra 21-05-2024

Yordanova, Huien Mi H.M.V. 15 days ago

Today I showed my onepager and portfolio to the teacher and explained my code, she liked that the code is clear and suggested to add comments on my code. I will work on cleaning my code for the portfolio this week and upgrade and get more feedbacks for the learning outcome structure.

Checkpoint 5 Week 12: Portfolio delivery feedback (Raja) 17-05-2024

Yordanova, Huien Mi H.M.V. 19 days ago

Today I showed my portfolio, and the teacher told me to change the background color to match the other pages, to put a customized logo, and to put my picture on the 'about me' page. I asked if my learning outcomes' structure was good, and I got a positive answer.

Checkpoint 4 Portfolio feedback - Erwin 16-05-2024

Yordanova, Huien Mi H.M.V. 20 days ago

I asked for feedback on my portfolio, and the teacher told me it's a very bright and colorful portfolio. He gave me suggestions to fix the learning outcomes dropdown to make it less complicated, and the movement of my "Miya's Portfolio" he told me to fix it. I still have a lot of work to do.

Checkpoint 8 week15 Monday PEP Corrie 03-06-2024

Yordanova, Huien Mi H.M.V. 2 days ago

Today I showed my portfolio to my teacher, and we looked through the figma prototype of my portfolio too, so I can show what changes I will make. She suggested for the learning outcomes to add a back button, make the background with a color and test it with someone. Overall she told me I am doing well and I should keep up with it.

Write a summary of what you discussed with your teacher...

Checkpoint 7 Talk with Lars (week 14) 29-05-2024

Checkpoint 10 Portfolio feedback - Erwin 06-06-2024

Yordanova, Huien Mi H.M.V. a day ago

Today I showed my teacher my portfolio and he suggested to add something that in the learning outcomes when you scroll you can follow where you are at. I am thinking about adding a bar below and there will be dots in each section so you can see the end and the start. I am still working on the content, there is content but I didn't fully describe the learning outcomes.

Checkpoint 9 Chris - Portfolio 06-06-2024

Yordanova, Huien Mi H.M.V. a day ago

Today I showed my portfolio to the teacher and he said that my structure has to improve. I can make a gallery so teachers can slide through the pictures and also if the pictures are small I can put a button "here" where it will show them the documentation (pdf). Also for my content, I have to make it more detailed because it's a cycle and I have to add what changes I made because of the feedback. My teacher suggested that for the landing page, I could use Photoshop to cut the mountains and make an effect with JavaScript. Overall I will update my portfolio and make it easily usable for my teachers.

Checkpoint 12 Dirk - Portfolio (WK15) 07-06-2024

Yordanova, Huien Mi H.M.V. 3 hours ago

Today I showed my portfolio and I got feedback to make the items clickable as a whole, the structure of the content was good and overall the portfolio is cute. I will make the changes and apply them to my portfolio for my submission.

Checkpoint 11 Week 15: Portfolio feedback 07-06-2024

Yordanova, Huien Mi H.M.V. 4 hours ago

Today I showed my teacher the portfolio and everything went well. I need to fix professional skills and make it like Professional Standards and Professional Leadership. I plan to fix it by today but if not possible the content that is needed is still there and I will upload the final portfolio upgraded.

Checkpoint 13 week16 day1 Pep Corrie 10-06-2024

Yordanova, Huien Mi H.M.V. 18 days ago

Today i showed my teacher the portfolio. She liked it and told me to fix the text in the boxes where are the learning outcomes but that is a minor thing. She asked me about my code following things: How I did my sliding gallery and how come in "Iterative Process" in the feedback section there is no background, she wanted the know what changed so I explained to her that in the HTML the feedback section doesn't have id=about so in the CSS it won't edit and add background to that part. She was happy that I explained and she told me that now she is sure that I made it. Overall she was happy with my portfolio.

Checkpoint 12 Dirk - Portfolio (WK15) 07-06-2024

Yordanova, Huien Mi H.M.V. 21 days ago

Today I showed my portfolio and I got feedback to make the items clickable as a whole, the structure of the content was good and overall the portfolio is cute. I will make the changes and apply them to my portfolio for my submission.

Reflection:

After the feedbacks I tried to make more changes but some of them I couldn't make them happen but I tried. I will use this ideas for the next semester and try for sure to make them then. But I realized how

important is to stay consistent and not make drastic changes with the different pages.

Project Plan

Learning Goal: Understanding Project Management Principles

Action: Making a Project Plan for the group project

Research: We attended lectures for our project plan and received feedback to improve it. Initially, we defined the current situation, identified the problem, and proposed our solution in our project plan. Following this, we conducted a brainstorming session to create a MoSCoW table. Using this table, we prioritized features, distinguishing between essential and optional ones to develop later, if time allowed. However, after finalizing the project plan, our group experienced a decline in motivation. While other teams progressed with their Figma prototypes, we lagged behind.

A motivational push from our teacher became a clear signal that we needed to regain motivation. On that same day, we developed our paper prototype, established Trello boards, and set team agreements. In Trello, we outlined small tasks to keep us on track, and our team agreements included penalties to enforce punctuality and improve communication.

Results:

Reflection:

Reflecting on our project plan and its execution, there were several key takeaways. Initially, our structured approach to research and defining the project's scope was effective. Attending lectures and incorporating feedback allowed us to refine our project plan and ensure that we were addressing the problem comprehensively.

Presentation

Action:

Making presentation for the group project/ inspirations

Research:

I wanted to make a cool presentation for the project, so after the storytelling lecture with our teacher Chris, I had the idea to make it like an actual book where we can tell the story of our project. I found how to do it on YouTube, and for the "our solution" section, I used my knowledge from past presentations and created it using morphing transitions. I also used AI to make the pictures in the story. I wanted a good opening and closing to keep my audience's attention, so I made a trending video with cats from TikTok and used our classroom as the background.

Feedback:

When I presented with my group every teacher that was there really liked the presentation and the audience were entertained too and laughed from the video

Results: (video)

Reflection:

I really enjoyed making the presentation because I learnt from my teachers that when you have a good presentation you can sell any product.
