Brainstorming

Action:

Making a brainstorm for my group project website and trying new techniques

Research:

I conducted brainstorming sessions using various techniques for the project. First, I attended a lecture about brainstorming, where the teacher suggested brainstorming on our own first, then combining all our ideas and brainstorming new ones together. That's how I did it. I ended up with the final result that was used for our prototype. I didn't want to use the internet extensively, so initially, I decided to imagine the website and brainstorm. However, for more ideas, I eventually searched online to see what could be added.

High-Low Risk

Action: Identify and categorize project risks, and develop mitigation plans.

Research:

With the help of the brainstorming table and the exampled presentation from Canvas, I marked with colorful markers our High-Low risks first on paper and then I made it on PowerPoint. This day we had to add in the presentation the Moscow table too.

RISK ANALYSIS, DELIVERABLES & GANTT CHART

Group HobIT

RISK ANALYSIS

- Absence - **High-Risk**
Solution: Rules and penalties, meetings to decide penalties
- Miscommunication - **High-Risk**
Solution: Update frequently, use of standups meetings
- Low quality design - **Low-Risk**
Solution: Adjust design based on feedback, minimize design
- Marketability - **Low-Risk**
Solution: Adjust design based on feedback
- Implementation issues - **Mid-Risk**
Solutions: Make use of MoSCoW
- Time management - **High-Risk**
Solutions: Make deadlines 2 or 3 times more than estimated time, meetings to know if someone has to catch up.

THANK YOU

Inspiration for the project

Action: Finding websites and do a Competitor Analysis

Research:

First I went on facebook and then instagram to find inspiration from my sign up page but I didn't quite like the design so I changed it into a pop-up from reddit you can see that I took the idea to have a pop-up to choose some interests and the outline was idea from my teacher. In the photo you can see what is used in and what not.

Feedback:

Neuman, Yurick Y.F. a month ago

Today we presented our current interactive Figma prototype and received feedback on it. We were told that we could do more to better get across the idea of bringing people into "circles". It's important to ensure the design tells a story to the user.

Other things such as the random colors on Hobby Tags should be more defined in meaning, tying them to a category could help make them more clear.

We should make sure to elaborate on the site's functions in our documentation, especially the functions that aren't present/functional. Things like a tutorial to navigate the site or how the algorithms would work helps show that we did think about them as they are crucial to the site's hypothetical operation.

Checkpoint 7 Checkpoint 1 - Lody 27-05-2024 🔒

Neuman, Yurick Y.F. a month ago

We received feedback on our work in progress Figma. Our teacher suggested that if the site is based on /hobbies that we should communicate it in what is shown to the user. Currently "People" and "Events" take more priority when the interests should be at the forefront. This could be achieved by making the home pages be more specific in its recommended categories.

The site could also benefit from very neon pop art-like colors to help it stand out from standard cliche site colors.

The use of circles helps communicate people or friends as they're associated with terms like "inner circle" or "bubbles".

Neuman, Yurick Y.F. a month ago

Interests should be a lot more in depth and not broad. Instead of "Music" split them into genres, instead of "Sports" split them into different games

Results:

Reflection:

Getting inspirations from other social platforms can benefit but their ideas and style won't benefit me everytime. But its good to do a research and see what suits my taste. Asking frequently for a feedback helped me with the final product to have everything that is needed and to look good

Portfolio

Action:

- design choices for your portfolio

Research:

- First, I went to other platforms like Dribbble, Pinterest, and TikTok. I found inspiration on Pinterest, but I couldn't fully replicate it. However, it gave me the idea for the heading in my portfolio to move when you scroll and to go behind the mountains. When I was small, I really liked Adventure Time, so I decided to base my portfolio on that. I used ChatGPT to polish small details. For example, my heading didn't scroll smoothly, so I had to search for a solution, and now I use this tool when needed. On TikTok, there were many ideas, but for my learning outcomes page, I was inspired by Dribbble when I was searching for "my project" ideas. I added a nice background, and after receiving feedback, I changed the background color on my landing page too.

Checkpoint 4 Portfolio feedback - Erwin 16-05-2024

 Yordanova, Huien Mi H.M.V. 20 days ago
I asked for feedback on my portfolio, and the teacher told me it's a very bright and colorful portfolio. He gave me suggestions to fix the learning outcomes dropdown to make it less complicated, and the movement of my "Miya's Portfolio" he told me to fix it. I still have a lot of work to do.

Checkpoint 3 Dirk - Porfolio (WK12) 15-05-2024

 Yordanova, Huien Mi H.M.V. 21 days ago
Today I asked the teacher for feedback on my portfolio, he wanted to make it on Figma first and to check more websites for inspiration. Also, he told me to remove the weeks from the navbar and put there the learning outcomes .

Checkpoint 2 Peer Feedback week 12 portfolio 15-05-2024

 Yordanova, Huien Mi H.M.V. 21 days ago
Today I asked for feedback from my classmate and she liked the website but told me that the effects were not moving smoothly so she suggested fixing that and also resizing the pictures in it.

unfortunately, due to the scale from undefined to orienting, it is now this result. But, no worries, do what you do and that will certainly get you into the "beginner" next time.

Checkpoint 6 Feedback with Petra 21-05-2024

 Yordanova, Huien Mi H.M.V. 15 days ago
Today I showed my onepager and portfolio to the teacher and explained my code, she liked that the code is clear and suggested to add comments on my code. I will work on cleaning my code for the portfolio this week and upgrade and get more feedbacks for the learning outcome structure.

Checkpoint 5 Week 12: Portfolio delivery feedback (Raja) 17-05-2024

 Yordanova, Huien Mi H.M.V. 19 days ago
Today I showed my portfolio, and the teacher told me to change the background color to match the other pages, to put a customized logo, and to put my picture on the 'about me page'. I asked if my learning outcomes' structure was good, and I got a positive answer.

Checkpoint 8 week15 Monday PEP Corrie 03-06-2024

Yordanova, Huien Mi H.M.V. 2 days ago

Today I showed my portfolio to my teacher, and we looked through the figma prototype of my portfolio too, so I can show what changes I will make. She suggested for the learning outcomes to add a back button, make the background with a color and test it with someone. Overall she told me I am doing well and I should keep up with it.

Write a summary of what you discussed with your teacher...

Checkpoint 10 Portfolio feedback - Erwin 06-06-2024

Yordanova, Huien Mi H.M.V. a day ago

Today I showed my teacher my portfolio and he suggested to add something that in the learning outcomes when you scroll you can follow where you are at. I am thinking about adding a bar below and there will be dots in each section so you can see the end and the start. I am still working on the content, there is content but I didn't fully describe the learning outcomes.

FeedPulse

Checkpoint 9 Chris - Portfolio 06-06-2024

Yordanova, Huien Mi H.M.V. a day ago

Today I showed my portfolio to the teacher and he said that my structure has to improve. I can make a gallery so teachers can slide through the pictures and also if the pictures are small I can put a button "here" where it will show them the documentation (pdf). Also for my content, I have to make it more detailed because it's a cycle and I have to add what changes I made because of the feedback. My teacher suggested that for the landing page, I could use Photoshop to cut the mountains and make an effect with JavaScript. Overall I will update my portfolio and make it easily usable for my teachers.

Checkpoint 12 Dirk - Portfolio (WK15) 07-06-2024

Yordanova, Huien Mi H.M.V. 3 hours ago

Today I showed my portfolio and I got feedback to make the items clickable as a whole, the structure of the content was good and overall the portfolio is cute. I will make the changes and apply them to my portfolio for my submission.

Checkpoint 11 Week 15: Portfolio feedback 07-06-2024

Yordanova, Huien Mi H.M.V. 4 hours ago

Today I showed my teacher the portfolio and everything went well. I need to fix professional skills and make it like Professional Standards and Professional Leadership. I plan to fix it by today but if not possible the content that is needed is still there and I will upload the final portfolio upgraded.

Checkpoint 13 week16 day1 Pep Corrie 10-06-2024

Yordanova, Huien Mi H.M.V. 18 days ago

Today i showed my teacher the portfolio. She liked it and told me to fix the text in the boxes where are the learning outcomes but that is a minor thing. She asked me about my code following things: How I did my sliding gallery and how come in "Iterative Process" in the feedback section there is no background, she wanted the know what changed so I explained to her that in the HTML the feedback section doesn't have id=about so in the CSS it won't edit and add background to that part. She was happy that I explained and she told me that now she is sure that I made it. Overall she was happy with my portfolio.

Checkpoint 12 Dirk - Portfolio (WK15) 07-06-2024

Yordanova, Huien Mi H.M.V. 21 days ago

Today I showed my portfolio and I got feedback to make the items clickable as a whole, the structure of the content was good and overall the portfolio is cute. I will make the changes and apply them to my portfolio for my submission.

Reflection:

After the feedbacks I tried to make more changes but some of them I couldn't make them happen but I tried. I will use this ideas for the next semester and try for sure to make them then. But I realized how

important is to stay consistent and not make drastic changes with the different pages.
